

Hu-Friedy Mfg. Co. LLC “Team Vista” VistaTab and VistaClean has achieved the following standards for the EDA Accepted Seal:

Sustainable Manufacturing Distribution

- Product is manufactured in the US.
- Manufacturing/distribution operations include a yearly corporate clean-up day.

Waste Reduction

- No Styrofoam is used in the shipping of products.

Pollution Prevention

- Product ingredients are verified to be “Generally Regarded as Safe”.
- Team Vista helps to prevent pollution in the dental practice by not introducing unsafe or hard chemicals or metals down the drain into the water source.
- VistaTab is an antimicrobial product that is designed to kill microorganisms. After the sodium chlorite turns into chlorine dioxide and does its job, it quickly turns into hydrogen and chlorides which are not harmful to the environment.
- Product is an irrigant and organic food grade.

Patient Care, Workplace Policies, Triple Bottom Line Business Practices

- Manufacturer/Distributor offers corporate match program designed to encourage charitable giving and maximize the impact of donations. Employee contributions are matched 2-to-1 by Hu-Friedy; Charities include focus areas of education, healthcare and environment.

Leadership

- Hu-Friedy introduced Envirodent 15 years ago – the longest running instrument recycling program of its kind. The program recycles over 3 tons of metal every year.
- Company promotes products eco-friendly claim as key product benefit.
